MARKUS SCHAEFER *MSc, MArch, SIA*

HOSOYA SCHAEFER ARCHITECTS AG is a Zürich based office for architecture, urban design and research since 2003. The office has won several first prizes and is working on a wide spectrum of projects such as a 230 ha masterplan in Ljubljana, mobility research for Volkswagen or train stations in Toronto. In Switzerland, the office won first prizes for the Airport Engadin and the train station area St. Moritz. More recently, a regional study "Metrobild" has been prepared for the Metropolitan region of Zürich and several urban planning projects completed in the same perimeter. A combination of academic work, project practice and research for clients allows the firm to develop and refine a solid, systemic and innovative understanding of our urban future.

MARKUS SCHAEFER has a Masters of Architecture from Harvard University. In addition, he also has a Masters in Neurobiology from the University of Zürich. At Harvard, he first collaborated with his current partner Hiromi Hosoya on the Harvard Guide to Shopping, edited by Rem Koolhaas et al. and published by Taschen in 2001. Prior to founding Hosoya Schaefer, Markus Schaefer was a director of AMO in Rotterdam. AMO is the think tank and research department of OMA, the architecture office established by Rem Koolhaas.

Both with work at OMA and at Hosoya Schaefer, Markus Schaefer has won several international awards. He lectures and publishes regularly. He is also partner and head of research at CityTrackerX AG, a privately funded research and development company aiming at a real-time performance analysis of cities.
